PREAMBLE

The concern for improvement of education had been at the top of India's development agenda since independence. In this respect several commissions were appointed by Government of India from time to time to formulate policies and programmes required to enhance access to and participation in education and thus improve its quality. In continuation with this, National Education Policy too provides a framework for development of education over the few years. It places an unprecedented focus on bringing out significant changes at all levels to improve quality education and ensure educational opportunities to all segments in the society.

Within this umbrella Awadhesh Pratap University too proposes to hold a brain storming conclave of august educationists, scientists, teachers, media persons etc to share their views on the upcoming NEW EDUCATION POLICY-2016 and prepare a draft resolution with entire focus on HIGHER EDUCATION for submission to Ministry of Higher Education.
